Name Server	
Note: The nameservers below may not appear in the same order as you entered them. The ord	
Name Server1 :	<input type="text" value="ns1.anynameserver.com"/>
Name Server2 :	<input type="text" value="ns2.anynameserver.com"/>
Name Server3 :	<input type="text"/>
Name Server4 :	<input type="text"/>
Name Server5 :	<input type="text"/>
Name Server6 :	<input type="text"/>
Name Server7 :	<input type="text"/>
Name Server8 :	<input type="text"/>
Name Server9 :	<input type="text"/>
Name Server10 :	<input type="text"/>
Name Server11 :	<input type="text"/>
Name Server12 :	<input type="text"/>
Name Server 13 :	<input type="text"/>
<input type="button" value="Submit"/>	

6. Logout from the domain account.

7. Now login to your cPanel account and click on the Addon Domains icon, as the picture below shows...

Please update your contact information here.

8. Enter your domain name, a subfolder on the main domain that will serve as the addon domain root and a password, as the picture below shows...

New Domain Name:	<input type="text" value="johndoessqueezepage"/>
Username/directory/subdomain Name:	<input type="text" value="johndoes"/>
Password:	<input type="text" value="12345"/>
	<input type="button" value="Add Domain!"/>

9. Logout from the hosting account.
10. DONE!
